**Covered Bridges of New Hampshire
Sponsored by the NH Humanities Council**

Monday, October 25th at 1PM

Covered wooden bridges have been a vital part of the NH transportation network, dating back to the early 1800s. Given NH's myriad streams, brooks, and rivers, it's unsurprising that 400 covered bridges have been documented. Often viewed as quaint relics of a simpler past, they were technological marvels of the day. It may be native ingenuity and NH's woodworking tradition that account for the fact that a number of nationally noted covered bridge truss designers were NH natives. Discuss covered bridge design and technology, learn about their designers, builders, and associated folklore. Highlighted by images of NH bridges, past and present. Witness their ultimate transition from commonly used structures to historic icons.

Presenter: Glenn Knoblock

B.A. in History, Bowling Green State University; independent scholar and author of ten books and over 70 articles. He is an author and researcher on projects relating to New Hampshire history.

*This program is free and open to the public – reservations required.
